18 janvier 2022	52	Bureau 0043	Réserver
19 janvier 2022	21	Bureau 0012	Réserver

Bookings

The screenshot displays the 'Réservation' (Reservation) interface. At the top, it shows the user's name 'Francis Cantin' and a search prompt 'Sélectionner les critères de recherche'. Below this are several filter categories: 'Bâtiment' (Building) with a dropdown for 'Bâtiment 1, Bâtiment 2'; 'Étage' (Floor) with a dropdown for 'Tous'; 'Secteur' (Sector), 'Salle' (Room), and 'Type' (Type) with dropdown menus; 'Date' (Date) set to '12 janvier 2021'; and 'Heure' (Time) set to '8:30 | 18:30'. There are also checkboxes for 'Voir uniquement mes favoris' and 'Toute la journée'. A search icon is on the right. Below the filters, it says 'Vos résultats de recherche' and 'Afficher uniquement les places disponibles' with a toggle switch. The main area shows a floorplan map for 'Bâtiment 1' with 'Étage 2' selected. The map displays various desks and meeting areas, some marked with orange dots indicating availability or booking status. A sidebar on the left contains navigation icons for home, calendar, and settings.

Hot Desk Booking

ELIA allows employees to book a workspace adapted to their needs via an interactive floorplan.

Dynamic Map

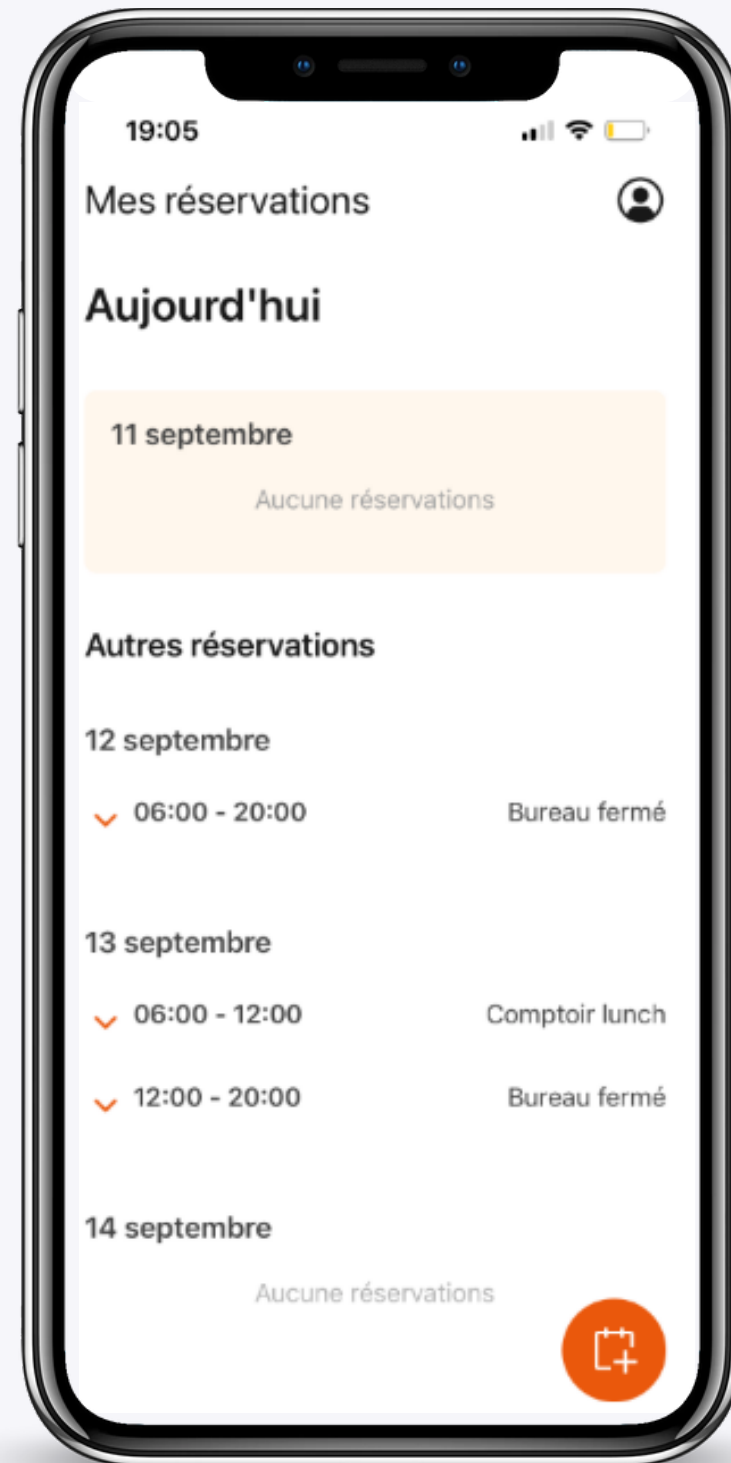

With just a few clicks, ELIA allows you to locate colleagues and book a space with or near them, encouraging in-person collaboration.

Space Management

Managers can access booking data in order to properly plan the distribution of furniture or the use of spaces.

Bookings

Make Bookings on the Go

The ELIA mobile app allows employees to book a workspace in a user-friendly way while on the go. The mobile app also allows employees to locate their colleagues within the office in real time.

Available on Popular Platforms

The Elia app is available via iOS and Android platforms.

Collaboration

Find Colleagues

Encourage Return to the Office

ELIA was specifically designed to facilitate in-person collaboration within hybrid workplaces.

Thanks to its smart notifications, ELIA allows colleagues to synchronize in-office days in a convenient manner, encouraging employee return to office.

ELIA

Olivia Brooks just booked a desk for Tuesday & Friday

5m ago

Hi Isabelle,

57% of your teammates will be at the office on **Monday** and **Thursday**. Want to join them?

Analyse Occupancy Data

Centralized IoT Hub

The data collected through the platform allows ELIA to analyze workplace occupancy and decipher trends.

This helps companies better understand their employees' habits and adapt office spaces to better suit their needs.

Let's Connect Your
Resources to Your
Infrastructure.
